## LOUVER PROFILES

MAXISWOOD's Recycoex Louver Profiles is a direct fixing method whereby battens are either face-fixed or back-fixed directly through the profile to achieve visible fixing and a familiar installation technique. Louver Profiles are also finished on all faces for applications where the batten is visible on both sides of the installation. Tube Profiles are suitable for internal and external design. End cap is made in the same material.

## MAXIS DECK

Maxis Deck can be installed in virtually any design option. The unique profiles offer dimensions in architectural design options whilst offering long term low maintenance durability. Maxis Deck shows the appearance and aesthetics of natural timber without the undesired cracking, splitting or warping characteristics of timber.

Our premium decking can be worked with conventional wood workman techniques. It is natural weathering resistance coupled with a life UV matt coating and will ensure a low maintenance product.

### THREE TYPES:

**New Tech Decking** / Size: 150x22x2400mm

**Solid Decking** / Size: 140x21x2400mm

**Solid Decking S** / Size: 97x20x2400mm
